

HWR 431/531 homework format

The HWR 431/531 homework should follow this general format:

- follow exactly the directions given
- use only one side of paper
- number each page
- write your name on each page
- start each new problem on a new page
- staple pages together
- include summary (in your words) of the problem statement
- write out formulas used in symbolic form
- list all symbols and values with their given units
- solve problems in symbolic form before plugging in values
- in simple words, describe what you are doing in each step
- box or underline the answer with associated units

Note: Try to use computers for graphing, typing, spreadsheet calculations. If you have never done this before, you may find it time consuming at first. But with time your efficiency will improve and you will never want to do anything by hand again.
